PROFESSIONAL SUMMARY

Full-stack software engineer with 2+ years turning business problems into working software: TypeScript and PostgreSQL backend services on AWS and Vercel, internal tools, and LLM-powered automation, paired with polished React frontends.

SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, Bash

Backend: Node.js, Express, PostgreSQL, Redis, Prisma, Supabase, MongoDB, SQLite, FastAPI, Spring Boot, REST APIs, Stripe, OAuth, JWT

Frontend: React, Next.js, HTML/CSS, Tailwind CSS, shadcn/ui, GSAP, Framer Motion, Recharts, Zod, Vite, Sanity CMS, Figma

Infrastructure & Tools: AWS (EC2, RDS, S3, KMS), Docker, Vercel, Git, GitHub Actions, CI/CD, Jest, LLM APIs (Claude, Gemini), Ollama, RAG

WORK EXPERIENCE

Full Stack Software Engineer

Mar 2025 - Present

National GridX Consulting

Remote (Dallas, TX)

- Architected a **13M-record** address search microservice in Node.js on AWS EC2 and RDS, with a daily ETL pipeline, PostgreSQL B-tree and trigram indexes, and Redis caching for **sub-100ms** lookups, saving **\$15K/year** in vendor fees.
- Designed a TypeScript pricing engine that normalizes **500+** electricity offers into an effective per-kWh rate across delivery charges, usage tiers, and bill credits, with LLM-powered bill OCR that reads uploaded PDFs and photos to calculate customer savings.
- Shipped an internal CRM in Next.js and PostgreSQL that manages commercial energy deals from lead intake to signed contract, automating supplier quote snapshots, RFP workflows, and enrollment packet generation.
- Implemented a subscription energy platform with Stripe billing and webhooks, e-signature enrollment, AWS KMS-encrypted customer PII, transactional email, and role-based admin tools for plan fulfillment.
- Engineered a Sanity-based CMS and content generation pipeline with reusable Next.js page components, producing **~15,400** server-rendered SEO pages across 200+ Texas cities and lifting qualified leads **15%**.

Software Developer

Jun 2025 - Present

Midnite Marketing Agency (Contract)

Houston, TX

- Automated prospect research and outreach with Claude LLM agent workflows and REST API integrations, cutting operational costs **20%**.
- Developed a Chrome extension and React/SQLite dashboard that captured **13,000+** Instagram leads, screened them into a 2,000+ account outreach pool, and drives 150 ranked DMs per day.
- Delivered features and integrations for 5 client accounts and launched a Next.js site lifting inbound inquiries **30%** in its first month.

Software Developer Intern

Apr 2024 - Jan 2025

Aesyn

Remote (Austin, TX)

- Integrated Meta APIs into real-time React/Recharts analytics dashboards surfacing creator engagement for influencer selection.
- Authored a reusable React/TypeScript component library from Figma designs, accelerating team feature delivery **40%**.
- Resolved **30+** high-priority bugs and performance bottlenecks across the Next.js/Node.js stack, cutting page load time **20%**.

PROJECTS

Tryal (Co-Founder) | Next.js, TypeScript, Spring Boot, PostgreSQL, Redis, Stripe, Google Maps API

Subscription platform where members spend monthly credits on local experiences. Led frontend architecture and shipped booking, recurring Stripe subscriptions, partner listing tools, and Google Maps search; cut sign-up drop-off **40%**. [View]

Grounded RAG | Python, FastAPI, Ollama, React, TypeScript, pytest

Offline AI assistant that answers questions from local documents using keyword and vector search, cites its sources, and declines when the answer isn't there; created an evaluation suite that raised citation accuracy from **69% to 94%**. [View]

Blah2Text | Python, faster-whisper, CTranslate2, Silero VAD, Ollama, Win32

Offline voice dictation for Windows that types cleaned-up speech into any app, including terminals and code editors, in **~0.9s** using Whisper and a local LLM, with automatic GPU-to-CPU fallback and recovery when the LLM stalls. [View]

EDUCATION

B.S. Computer Science, Western Governors University

2024
